MONSANTO CANADA INC.

Monsanto is an agricultural company. We apply innovation and technology to help farmers around the world be successful, produce healthier foods, better animal feeds and more fiber, while also reducing agriculture's impact on our environment.

Monsanto Canada - headquartered in Winnipeg - offers Canadian farmers a full line of canola, corn and soybean seed and works with industry partners to broadly license biotechnology traits including *Roundup Ready* technology for canola, corn and soybeans and *YieldGard* insect protection for corn. We also market Roundup® brand herbicides that have been instrumental in helping farmers reduce tillage and adopt more sustainable farming practices.
